The City of Norman will be replacing the existing in-roadway pedestrian lighting system on Porter Avenue at Acres Street. A new system will replace the existing system which has failed at this location. The work will be performed by Traffic Signals, Inc., beginning Monday morning, October 11 at 9:00 AM. The work involves saw-cutting, coring and power washing the roadway surface in order to install the new lights into the roadway surface.

Work is expected to begin in the two center lanes of Porter Avenue and progress into the two outside lanes. Lane closures will be required as work progresses. The City's Traffic Division will assist with the construction traffic control during installation. The installation is expected to be completed within one day.
